Submitted by,

**Name:** KAVIYA DHARSHINI G

**REG NUMBER:**2017110

**Company Name:** Siemens Technology and Services Private Limited

**Domain Name** : Data Analytics

### **About Company:**

**Siemens Technology and Services Private Limited (STSPL)** is the Indian subsidiary of German multinational engineering and electronics conglomerate [Siemens](#) that focuses on IT and management services. The subsidiary is split into four units: Corporate Technology India, Siemens Corporate Finance and Controlling, Global Shared Services, and Siemens Management Consulting.

### **PROJECT:**

The Project deals with controlling the signal for autonomous trains in France.

**Internship Duration:** 45 Days from 18<sup>th</sup> July 2022 to 2<sup>nd</sup> September 2022

**Worked with some of the tools used to Analyse data:**

- Grafana
- Kafka
- Fluentbit
- PostgreSQL

**Grafana:**

- It is an open source web application for visualizing data.
- It is a continuous monitoring tool that helps to visualize real-time data in an application so that we can visualize how it is working in real time.
- A csv file is added as a data source and was visualized using Grafana.
- The details of the train signals were visualized.
- Database(PostgreSQL) is connected to Grafana and data were extracted from it by giving the details of the username, password and database name .

## **Kafka:**

- Kafka is an open source platform developed to handle real time data. Messages that were sent by the producer was analyzed and passed to the consumer.
- The details of the passengers were transferred from one host to another.

## **Fluentbit:**

- Fluent Bit is an open source log shipper and processor, that collects data from multiple sources and forwards it to different destinations.
- The input details of different train signals were collected and processed.

### **Takeaways from this course:**

- Pass data from producer to consumer using Kafka.
- Visualize the given data.
- Work with the database PostgreSQL.
- Import csv file into PostgreSQL to convert to a table and convert a table to the csv file.

### **Conclusion:**

On completion of this Internship, I was able to work with data and analyze it. Also I have gained experience and confidence which might be useful in my career.
